INDUSTRIAL PRODUCTION

The seasonally adjusted index of industrial production rose marginally in June. Manufacturing production continued to show strength while mining partially recovered from its May fall-off. Electricity and gas fell sharply.

EMPLOYMENT AND AVERAGE HOURS WORKED

The seasonally adjusted industrial employment index declined in June. Manufacturing employment showed little change. Employment in mining rose fractionally.

LABOUR INCOME AND FARM CASH INCOME

In June, seasonally adjusted labour income fell. The majority of the categories failed to show strength, either falling or remaining stable. The largest fall-off was in the labour income derived from construction. Seasonally adjusted farm cash income rose sharply in the first quarter.

RETAIL TRADE

In June, seasonally adjusted retail trade fell sharply. The decline was concentrated in grocery and combination stores and clothing stores. Department store sales fell off also.

4 Note.—Until the end of 1956, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Figures for 1957 and 1958 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

⁽¹⁾Not applicable to figures on population and immigration.

⁽²⁾Yukon and North-West Territories not included in figures for births, marriages and deaths.

⁽³⁾Estimates are given by years as of June 1 and by quarters for Canada.

⁽⁴⁾Exclusive of stillbirths.

⁽⁵⁾Immigrant admissions by country of last permanent residence. Annual and quarterly figures are totals for the period.

*In this report, the quarterly data published in "National Accounts, Income and Expenditure, Fourth Quarter and Preliminary Annual 1957" have been mechanically linked for the years 1956 and 1957 to the new annual levels published recently in the reference document, "National Accounts, Income and Expenditure, 1920-1956" and Supplement. This linking process, which is carried out at the major group level, gives rise to small adjusting entries which are a reflection of slight weighting differences between the two sets of data. Revised quarterly data for the entire post-war period are at present in course of being re-worked in detail, and will be published later in the year.

⁸ ^(a)The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for livestock items and a seasonal adjustment for earnings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given to the seasonally adjusted figures for this item. ^(b)Includes adjusting entry. ^(c)Includes residual error of estimate. ^(d)This item differs from column 4, bottom of page 6, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

28 Note: The coverage of this series has been expanded as of January, 1957 to include, in addition to Central Electric Stations industrial power installations that generate electricity for their own use. Except for utilities, comparable data for previous months are not available.

⁽¹⁾Prior to January, 1957, these totals include the net amount generated by the more important central electric stations, i.e. companies, municipalities, and individuals selling or distributing electric energy. From January, 1957 they include all generating agencies producing over ten million kilowatt hours per year. The total generated on the old basis for January 1957 was 7,457 million kilowatt hours.

⁽²⁾These columns include all generating utilities and generating industries respectively.

⁽³⁾Less imports.

⁽⁴⁾Total net generation less net exports. Total power available for disposal for January, 1957 on the old basis was 7,170 million kilowatt hours.

⁽¹⁾Includes gas used for house heating.⁽²⁾Barrels of 35 Imperial gallons.⁽³⁾Increase in natural gas sales and decrease in manufactured gas sales caused

by transfer of large company from manufactured to natural gas.

⁽⁴⁾Includes some free customers.

⁽¹⁾In industries where long-term contracts involve the receipt of program payments, all such payments are treated as sales. The series represents an estimated projection, on a monthly basis, of the latest available Census of Industry values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog. ⁽²⁾Total new orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlog. ⁽³⁾Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated year-end total values for each industry as obtained from annual surveys. ⁽⁴⁾Manufacturing inventory owned by manufacturers, whether held at plant or not, at end of period. Source: Monthly Report of Inventories, Shipments and Orders in Manufacturing Industries, D.B.S.

40 ⁽¹⁾Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

⁽²⁾Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

⁽³⁾Customs exports.

⁽⁴⁾Mill shipments destined for export.

Source: Monthly Report on Primary Iron and Steel, D.B.S.
Note.—Effective January, 1957, the data in this table relate to rolling mills products only. Shipments to consuming industries of castings, forgings and steel pipe, previously covered, are no longer included. On this account totals shown are not comparable with those of previous years.

⁽¹⁾ Shipments for further processing within own firm and for sale in Canada.

⁽¹⁾Includes some silvery pig iron formerly included with ferro-alloys.
⁽²⁾Excluding shipments for processing.
⁽³⁾Imports include, in addition to all other shapes, wire and wire rope. Imports exclude castings, forgings, fittings and couplings.
⁽⁴⁾Monthly average.

*Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 800 sample areas lying outside these municipalities were also chosen for complete enumeration.

⁽¹⁾The coverage was extended to 507 municipalities in 1948, and as of 1956, stands at 901, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

(1)Include subsidy on hogs.

(2)Based on price for hogs including Dominion premium. A rise in ratio favours production of beef.

(3)Previous to

January, 1958, quotations referred to steers up to 1,000 lbs. Now they refer to all weights.

⁽¹⁾Overseas clearances plus U.S. imports for domestic use compiled from returns of Canadian elevator licensees and advice from American grain correspondents.⁽²⁾Customs exports are adjusted to reflect actual physical movement of wheat flour from Canada. Data shown for the last three months are not so adjusted.⁽³⁾Annual data are monthly averages of crop year.^(a)Includes eggs for hatching.

* Short term loans outstanding extended mainly but not entirely to consumers and for other non-business purposes, by selected financial institutions. The table does not include loans of trust and loan companies, second mortgage loans on residential real estate and loans of some other financial institutions for which comparable data are not available. ⁽¹⁾Conditional sale agreements held in connection with the financing of retail purchases of consumer goods. ⁽²⁾Companies licensed under the Small Loans Act. Cash loans have no conditional sales contract but are usually repaid in instalments. ⁽³⁾Excluded from the above tabulation are charge accounts and instalment credit of certain categories of dealers whose credit is extended mainly to farmers and other businesses rather than to consumers. Instalment credit includes conditional sales agreements only. ⁽⁴⁾In addition to the items shown here, quarterly figures are available on the use of oil companies' credit cards from Dec. 1955 on. Balances were as follows:

Dec. 1955-56 Mar. 1956-19 June 1956-23 Sept. 1956-28 Dec. 1956-26 Mar. 1957-23 June 1957-27

⁽¹⁾Includes loans fully secured by marketable bonds and stocks, home improvement loans, etc. Excludes loans to finance purchase of Canada Savings Bonds. ⁽²⁾Figures for dates other than year ends are estimated on the basis of the loans by twelve companies.

(1)The trade figures have been adjusted to conform to balance of payments definitions of the international exchange of commodities.

(2)Balance also reflects all other current transactions.

(3)Net sales (+) or purchases (-) by Canadians of Canadian and foreign securities (trading, new issues and retirements.)

⁽¹⁾ Data in this table refer to railways with annual operating revenues of \$500,000 or over. Monthly averages for 1956 and 1957 differ from the sum of the monthly data due to revisions which cannot be allocated by months. ⁽²⁾ Prior to January 1957, includes the C.P., C.N., Quebec North Shore and Labrador and Pacific Great Eastern railways. Beginning in January, 1957, all railways follow the uniform classification of accounts, and the statistics previously shown in the "Other Railways" section in the upper half of the table are combined, as of that date, with those railways already following the new system. ⁽³⁾ Operating income equals operating revenues less operating expenses adjusted for tax accruals and rent of equipment and joint facilities. ⁽⁴⁾ As of January, 1958, statistics include the British Columbia Electric Railway. ⁽⁵⁾ As of January, 1958, the Hudson Bay Railway has been absorbed into the Canadian National Railway system. Source: Railway Operating Statistics, D.B.S.

⁽¹⁾Foreign exchange and foreign securities. ⁽²⁾Industrial Development Bank capital stock, bonds and debentures. ⁽³⁾Bank premises and all other assets.
⁽⁴⁾Capital, reserve fund and all other liabilities. ⁽⁵⁾On December 31, 1954, the basis for the valuation of securities held by the Bank of Canada was changed from "not exceeding market value" to amortized value, and for this reason figures for December 31 and later dates are not comparable with those for earlier dates.

^(*)Foreign items are no longer shown separately under assets and liabilities, but are included in a single net balance under "assets". The totals for assets and liabilities are revised to reflect this change in presentation.

⁽¹⁾Bank of Canada deposits are averages of the judicial days in the month shown while Bank of Canada notes and Canadian dollar deposit liabilities are averages of the 4 consecutive Wednesdays ending with the second last Wednesday in the previous month.

⁽²⁾The figures are not adjusted for items in transit. ⁽³⁾The statutory minimum requirement is a monthly average of 8 per cent.

⁽⁴⁾Mainly deposits of foreign banks. ⁽⁵⁾Capital, rest fund and undivided profits as at the latest fiscal year-end.

⁽⁶⁾Including issues payable in foreign currency. ⁽⁷⁾Beginning January 31, 1957, month-end figures for chartered bank holdings of Government of Canada and provincial government securities are based on "amortised value" and are therefore not directly comparable with figures for preceding months.

⁽⁸⁾Government of Canada and provincial government securities are based on "not exceeding market value". ⁽⁹⁾Securities purchased direct from issues with a term of less than one year at time of issue are classified as loans.

⁽¹⁰⁾Loans to grain dealers and exporters. ⁽¹¹⁾Loans to finance purchase of Canada Savings Bonds at time of issue.

⁽¹²⁾Total of foreign funds, short term foreign investments and other foreign currency assets less foreign currency liabilities.

⁽¹³⁾September 30, 1956, and subsequent dates have been reclassified and are not directly comparable with those for earlier dates due to a change in the classification of foreign currency loans in the returns of the banks to the Department of Finance.

⁽¹⁴⁾Beginning January 31, 1957, figures for certain chartered bank asset items are not strictly comparable with those for earlier dates, due to the reallocation of inner reserves consequent upon the securities valuation change referred to in footnote 7.

⁽¹⁵⁾Including loans to instalment finance companies.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and pension bonds without insurance. Totals are estimates projected from the sales reported by 32 companies operating in Canada representing 89 per cent of new ordinary insurance sales.

¹The Canada totals by months for 1957 do not correspond to the sum of the provincial totals as revisions applied to the national total are not yet available for the provinces.

The data for 1957 and 1958 are subject to revision.

⁽¹⁾Ordinary, Industrial and Group. ⁽²⁾Part of the apparent increase between 1957 and 1958 is due to a change in the "inflation" factors used to bring figures of reporting firms up to the estimated total level for all insurance companies. It is estimated that the 1957 figures for "ordinary" and "group" were understated by about 5%.

Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to net profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incurring losses. Estimates are based on profits as reported by a sample of all companies incorporated in Canada (excluding government-owned companies and incorporated co-operatives).

(1) Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction, Rubber, Leather, Non-Metallic Minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

(2) Includes, in addition to the industries listed, Tobacco, Printing and Publishing and Allied Industries.

NOTE.—*Revised series with coverage limited to business failures under the Bankruptcy and Winding Up Acts, excluding individuals not operating businesses as such.

⁽¹⁾In the Bankruptcy Act of 1949, provision is made for proposals from insolvent persons. Agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.

SOURCE: Commercial Failures Under the Provisions of the Bankruptcy and Winding Up Acts, D.B.S.
